APRIL - Pet Vaccination month

APR

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY
	1 Zoonoses Do you know what #ZoonoticDiseases are? They are illnesses that can be transmitted between animals & people. That's why protecting #AnimalHealth protects our health https://resources.animalhealtheurope.eu#resource/1831	**2 World Autism Awareness Day** On #WorldAutismAwarenessDay, we celebrate the life-changing work of autism assistance dogs! These incredible companions provide safety, emotional support & independence for autistic individuals, that's pure #PetPower! (PetPower HAB card Child-development-03)	**3 Vaccination** There are many benefits to vaccinating animals. This is one of them #VaccinesWork https://resources.animalhealtheurope.eu#resource/1041	**4 World Stray Animal Day** Today is #WorldStrayAnimalsDay – a reminder to adopt, foster, donate, or simply spread awareness. #AdoptDontShop https://resources.animalhealtheurope.eu#resource/156	5	6
7 World Health Day On this #WorldHealthDay, let's remember that human, animal & environmental health are deeply connected. Working together is essential to safeguard our #OneHealth. https://resources.animalhealtheurope.eu#resource/1815	**8 Pet Care** Why is it to important to keep pets vaccinated? Because vaccines work on a community level! #VaccinesWork #WAVD https://resources.animalhealtheurope.eu#resource/1699	**9 Sustainability** We all want our food to be produced sustainably. But #DYK? Healthy #livestock means lower #emissions. Check our infographic to understand how https://resources.animalhealtheurope.eu#resource/1465	**10 Hug Your Dog Day** It's #HugYourDog day, perfect opportunity to spend some quality time with your pooch! If your dog is not a fan of hugging, do something they prefer instead. Treats and pets are always a good option	**11 Innovation** #Innovation in animal health solutions is changing the way farmers are raising their animals, allowing for more individual care. Watch this to learn how https://resources.animalhealtheurope.eu#resource/1396	12	13
14 One Health In today's world we increasingly realise that human, animal and environmental health are connected. That's what #OneHealth is all about. https://resources.animalhealtheurope.eu#resource/1825	**15 Vaccines video** This Sunday, 20 April is #WorldAnimalVaccinationDay! Watch our video to learn how animal vaccination improves our world https://resources.animalhealtheurope.eu#resource/974	**16 Pet Care** Indoor cats also need to be vaccinated. #WAVD #Vaccination helps strengthen your cat's immune system and prevent serious illnesses that could shorten their lifespan. https://resources.animalhealtheurope.eu#resource/686	**17 DYK Vaccines** #DYK? There are several ways that animals can be vaccinated! How many of these methods had you already heard of? https://resources.animalhealtheurope.eu#resource/1458	**18 Pet Power** The bond we share with our furry friends has a positive impact on our #MentalHealth. That's what we call #PetPower https://resources.animalhealtheurope.eu#resource/1684	19	**20 World Animal Vaccination Day**
21 Rabies #Rabies is 100% preventable through animal vaccination. Ensuring dog vaccination against rabies can prevent deaths. #VaccinesWork #WAVD https://resources.animalhealtheurope.eu#resource/1312	**22 Food Safety** Protecting animals = protecting people These 5 foodborne diseases can be prevented by ensuring #AnimalHealth. https://resources.animalhealtheurope.eu#resource/1814	**23 Pet Care** In the UK alone, the pet rabbit population was estimated to be approximately 1 million in 2024. Not only cats and dogs need #vaccines, pet bunnies also need to be protected against diseases. #WAVD https://resources.animalhealtheurope.eu#resource/689	**World Immunisation Week** **24 Disease prevention** We all want our food to be safe. Animal #vaccination is one of the first steps to reduce chances of foodborne illnesses. https://resources.animalhealtheurope.eu#resource/1816	**25 World Veterinary Day**	26 World Veterinary Day	27
World Immunisation Week **28 Land use** Animal health solutions improve not only #livestock health but also #sustainability in #farming. Check this example https://resources.animalhealtheurope.eu/#resource/1455	**29 Sustainability** #Vaccination not only is an essential tool to prevent disease in animals, it also helps reduce #emissions from livestock. Check this out https://resources.animalhealtheurope.eu#resource/1456	**30 Stop Food Waste Day** 1/3 of the world's food is lost or wasted. Cutting food waste means: a more efficient food network, better nutrition, and a healthier planet. #StopFoodWasteDay https://resources.animalhealtheurope.eu#resource/1233
