

FEBRUARY - Pet Spay/Neuter month

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY
			1 Article https://theconversation.com/vaccinating-livestock-against-common-diseases-is-a-form-of-direct-climate-action-214514	2 PetPower (Cancer Day) This Sunday marks #WorldCancerDay. We all know that early diagnosis is key to survival, and cancer sniffing dogs are helping people with that #PetPower To know more about their work, check @MedDetectDogs website https://www.medicaldetectiondogs.org.uk/cancer-detection/	3	4 World Cancer Day
5 Children's Mental Health Week Children's #MentalHealth Week starts today! Studies have shown there are many health benefits for children growing up with pets #PetPower Check this out Find out more here: bit.ly/3Cm0V65	6 One Health Vector-borne diseases can affect people, pets, wildlife and farm animals. This #OneHealth challenge requires collaboration from different sectors to control the spread of these diseases https://resources.animalhealththeurope.eu#resource/1268	7 Article	8 Pet Care Did you know that there 3 main benefits to neutering or spaying your pet? Reduces the risk of illnesses affecting the remaining reproductive organs Changes unwanted behaviours related to mating Helps control animal populations	9 Sustainability We all want sustainably produced and affordable food And #AnimalHealth plays an important role in achieving that https://resources.animalhealththeurope.eu#resource/1072	10	11 International Day of Women and girls in science
12 Pet Power Some Monday pawssitivity: our pets bring so much positivity into our lives How has your furry friend helped you the most? #PetPower #HumanAnimalBond https://resources.animalhealththeurope.eu#resource/1316	13 Article	14 Disease prevention Why vaccinate livestock? Because it protects their health and welfare & it also protects us from food-borne illnesses, making our food safer #VaccinesWork https://resources.animalhealththeurope.eu#resource/1043	15 Pet Care Looking for an extra reason why spaying/neutering your pet is important? A study in the US found that sterilisation of both male and female dogs increased life expectancy, and the same is believed for cats. By sterilising your pet you help them live longer and healthier	16 Innovation From the very first #vaccines to today's smart solutions, our industry is constantly looking for the best ways to help #veterinarians, #farmers and animal owners care for their animals. Discover more about new #AnimalHealth solutions here https://connectedhealth.animalhealththeurope.eu/	17	18
19 Vaccination Modern animal health solutions are helping #farmers and #vets take better care of animals. #Vaccines, for example, can be administered in several different ways https://resources.animalhealththeurope.eu#resource/1458	20 National Love Your Pet Day It's #LoveYourPetDay, let's fill our feeds with our cutest pet pictures Meet the fur babies of our staff	21 Biosecurity How can we reduce the need for #antibiotics in farmed animals? ... Improving #biosecurity, protecting animal health and ensuring disease prevention methods https://resources.animalhealththeurope.eu#resource/1327	22 Article	23 World Spay Day Help your pet live a long and healthy life by spaying or neutering them! #WorldSpayDay It helps prevent diseases in the reproductive organs, such as cancer Speak to your #vet if you have any questions about the procedure #PetCare #PetHealth https://resources.animalhealththeurope.eu#resource/171	24	25
26 Antibiotics Antibiotic resistance is a concern for a lot of people & while it may seem tempting to restrict their use to people only, the unfortunate reality is that bacterial disease also affects animals and they need proper treatment. #ResponsibleUse is the way forward https://animalhealththeurope.eu/focus-areas/antibiotic-resistance/	27 Article	28 Food safety People are taking an interest in food production and #FoodSafety, and they are right to do so! Healthy animals help ensure healthy, safe food and help protect us against food-borne diseases and zoonoses. https://resources.animalhealththeurope.eu#resource/1397	29 Pet Power Our pets bring us so much love and affection They support our #MentalHealth and even our physical health, that's their #PetPower https://resources.animalhealththeurope.eu#resource/1145
